

HY-QZD automatic folder gluer

Introduction of the machine:

HY-QZD automatic gluer consist of three part which is feeding paper part, glue folding part and counting piling part, adjust the speed by digital, micro-adjust the phase by computer, with simple quick reliable and precise controlling style, automatic feeding paper, automatic gluing and folding, automatic counting ,automatic piling and outputting, average sticking speed is 150pcs/min,max speed is 220pcs/min.High efficiency, save energy, environmental is our top pursuit

Function and characteristic:

Automatically finish the top folding and middle folding, meanwhile finish the glue belt stick of the upper and down part, save labor and time.

suitable range is wide ,can be used in different size of carton, pulod and convenient to adjust.

The machine work steadily and reliable, the effect is firm and good boking.

Easy to operate and easy to maintain

Automatic amend the carton right-angle degree.

The finished product can be counted and speed-changing etc. automatically, pile, neatly, exactly output. The speed can be adjusted, can be controlled separately, the piling speed is 130m/min.

2.Control gauge part:

Input by the simple touch screen, can change the data, production speed and data-input while the machine is running, many change frntion of the screen.

3.Folding part

The first folding line is 180degree,the third folding line is 135 degree

4. Automatic amending part:

amending the fish tail scissors error ect, effectively

Main technology parameter:

Model	HY-2000	HY-2400	HY-2800
max.Cardboard	1000*2000mm	1200*2400mm	1400*2800mm
Mini.Cardboard	260*600mm	300*800mm	300*800mm
Installation area	2400*13500mm	2800*15500mm	3000*15500
Power Required	6.5kw	80. kw	10.5kw
